LIST OF CONTENTS

NUMBER 1

P. Tuğcu	1	Thermomechanical analysis of upsetting of a cylindrical billet
Y. Ezawa and **N. Okamoto**	13	Development of contact stress analysis programs using the hybrid method of FEM and BEM
D. S. Zhu and **Y. K. Cheung**	21	Postbuckling analysis of circular cylindrical shell under combined loads
L. E. Suarez, M. P. Singh and **E. E. Matheu**	27	Seismic response of structural frameworks with flexible connections
S. J. Foster, B. Budiono and **R. I. Gilbert**	43	Rotating crack finite element model for reinforced concrete structures
Y. Wu and **R. C. Batra**	51	An engineering penetration/perforation model of hemispherical nosed rigid cylindrical rods into strain-hardening targets
J. Cañas, R. Picón, F. París, A. Blazquez and **J. C. Marín**	59	A simplified numerical analysis of residual stresses in aluminum welded plates
E. Spacone, V. Ciampi and **F. C. Filippou**	71	Mixed formulation of nonlinear beam finite element
H. S. Dalimunthe and **K. S. Surana**	85	p-Version least squares finite element formulation for three-dimensional, incompressible, non-isothermal, non-Newtonian fluid flow
K. H. Hoon and **P. W. Khong**	107	The semi-energy and the lower bound methods to the post-buckling of plate
S. Kemal Ider	115	Stability of control forces in redundant multibody systems
N. I. Ioakimidis	123	Deciding in elasticity problems by using Sturm's theorem
A. H. Barbat, N. Molinares and **R. Codina**	133	Effectiveness of block iterative schemes in computing the seismic response of buildings with nonlinear base isolation
Dongyao Tan	143	Discrete analysis method for structural correlation responses
T. Y. Tsang and **A. Arabyan**	155	A novel approach to the dynamic analysis of highly deformable bodies

CAS 58/6—O

Yujun Kim, Moon-Soo Na and Seyoung Im	173	Delamination buckling of a short orthotropic tube under axial compression
Sh. Sadeghi and M. Mosavi Mashadi	183	A new semi-automatic method for node numbering in a finite element mesh
J. Ch. Ermopoulos and G. T. Michaltsos	189	Behaviour of square joints of steel frames under bending moments
J. Jirousek and Q. H. Qin	195	Application of hybrid-Trefftz element approach to transient heat conduction analysis
J. Shi	203	Computing critical points and secondary paths in nonlinear structural stability analysis by the finite element method
		Technical Note
Gongkang Fu and S. J. Boulos	221	Finite element analyses of irregular thick plates for signal pole design
	I	Software Survey Section

NUMBER 2

B. C. Watson and A. K. Noor	233	Nonlinear structural analysis on distributed-memory computers
P. Boisse, J. C. Gelin and J. L. Daniel	249	Computation of thin structures at large strains and large rotations using a simple C^0 isoparametric three-node shell element
H. Takabatake, H. Morimoto, T. Fujiwara and T. Honma	263	Simplified analysis of circular plates including voids
Jianguo Wang and K. Schweizerhof	277	Boundary integral equation formulation for moderately thick laminated orthotropic shallow shells
O. P. Gupta and S. S. Babu	289	Error analysis in applying a boundary element method for three-dimensional steady state potential problems
G. D. Gounaris, C. A. Papadopoulos and A. D. Dimarogonas	299	Crack identification in beams by coupled response measurements
M. K. Jana, K. Renganathan and G. Venkateswara Rao	307	The effect of nonlinearities on the strain concentration factors in solid propellant grains
M. Walker, S. Adali and V. Verijenko	313	Optimization of symmetric laminates for maximum buckling load including the effects of bending–twisting coupling
G. Prathap	321	Barlow points and Gauss points and the aliasing and best fit paradigms

S. Abrate	327	Vibration of point supported triangular plates
N. C. Cluley and **R. Shepherd**	337	Analysis of concrete cable-stayed bridges for creep, shrinkage and relaxation effects
Z. Sindel and **S. S. Tezcan**	351	Tangent stiffness properties of finite elements
G. Onu	367	Equivalences in the soil–structure interaction
Siu Lai Chan	381	Large deflection dynamic analysis of space frames
K. N. Khatri	389	Axisymmetric vibration of multilayered conical shells with core layers of viscoelastic material
S. N. Patnaik, D. A. Hopkins and **R. Coroneos**	407	Structural optimization with approximate sensitivities
		Technical Notes
P. O. Olomolaiye, F. C. Harris and **A. F. Price**	419	The sensitivity of bricklayers' output to changes in skill
K. M. Abdalla, A. Alshegeir and **W. F. Chen**	429	Analysis and design of mushroom slabs with a strut–tie model
	I	Software Survey Section

NUMBER 3

S. S. Badie and **D. C. Salmon**	435	A quadratic order elastic foundation finite element
I. Takewaki	445	Optimal frequency design of tower structures via an approximation concept
S. R. Voleti, N. Chandra and **J. R. Miller**	453	Global–local analysis of large-scale composite structures using finite element methods
S. Kemal Ider and **S. Oral**	465	Filament-wound composite links in multibody systems
Choong Yung Jung and **V. A. Pulmano**	471	Improved fuzzy linear programming model for structure designs
Y. T. Feng, D. Perić and **D. R. J. Owen**	479	A new criterion for determination of initial loading parameter in arc-length methods
M. J. Chajes, W. W. Finch Jr and **J. T. Kirby**	487	Dynamic analysis of a ten-story reinforced concrete building using a continuum model
Z. Abduljabbar, M. M. ElMadany and **A. A. AlAbdulwahab**	499	Active vibration control of a flexible rotor

A. Y. T. Leung and S. Rajendran	513	Global bifurcation of a three-hinged rod subject to a kind of follower force
S. S. A. Ravi, T. K. Kundra and B. C. Nakra	535	Reanalysis of plates modified by free damping layer treatment
S. Nagendra, D. Jestin, Z. Gürdal, R. T. Haftka and L. T. Watson	543	Improved genetic algorithm for the design of stiffened composite panels
D. Vassalos and S. Huang	557	Dynamics of small-sagged taut–slack marine cables
O. Santurjian and L. Kolarow	563	A spatial FEM model of thermal stress state of concrete blocks with creep consideration
Young Cho and Yook-Kong Yong	575	A multi-mesh, preconditioned conjugate gradient solver for eigenvalue problems in finite element models
H. S. Zibdeh and S. Nusier	585	Transient mean square response of stochastic systems
A. de Kraker and D. H. van Campen	597	Rubin's CMS reduction method for general state-space models
R. Takagi, T. Nakamura and K. Nakagawa	607	A new design technique for pre-stressed loads of a cable-stayed bridge
T. V. R. Chowdary, P. K. Sinha and S. Parthan	613	Finite element flutter analysis of composite skew panels
Hua Zhao	621	The virtual contact loading method for contact problems considering material and geometric nonlinearities
W. Hu and P. F. Thomson	633	An evaluation of a large time increment method
Ton Tran-Cong, C. Heinze and R. Jones	639	Determination of arbitrary, non-shearing end-loadings from the bulk stress on the lateral surface of a rectangular prism
		Technical Notes
K. Kanaka Raju and G. Venkateswara Rao	651	The effect of localized axisymmetric damages on the buckling of circular plates
K. Kanaka Raju and G. Venkateswara Rao	655	Thermal post-buckling of linearly tapered moderately thick isotropic circular plates
		Announcement
	659	Final Call for Papers: The Third International Conference on Computational Structures Technology, Budapest
	I	Software Survey Section

NUMBER 4

Z. P. Szewczyk and A. K. Noor	661	A hybrid neurocomputing/numerical strategy for nonlinear structural analysis
C. S. Putcha and J. M. Ferritto	679	Seismic hazard analysis—computer validation
A. E. Al-Ayyoub	689	Pipelined algorithm for Newton's divided difference interpolation
M. C. Gan, S. T. Tan and K. W. Chan	703	Flattening developable bi-parametric surfaces
I. M. Ibrahim, D. A. Crolla and D. C. Barton	709	Effect of frame flexibility on the ride vibration of trucks
A. Deb	715	Boundary element analysis of anisotropic bodies under thermo-mechanical body force loadings
V. Apostol and J. L. T. Santos	727	Sensitivity analysis and optimization of truss/beam components of arbitrary cross-section—I. Axial stresses
Jiong Tang and Wen-Liang Wang	739	Structural reanalysis in configuration space by perturbation approach: a real mode method
J. V. Ramasamy and S. Rajasekaran	747	Artificial neural network and genetic algorithm for the design optimizaton of industrial roofs—a comparison
E. Kita and N. Kamiya	757	Adaptive boundary element method for plane quasi-harmonic equation: application to stress analysis of shaft
D. J. Chen, D. K. Shah and W. S. Chan	765	Interfacial stress estimation using least-square extrapolation and local stress smoothing in laminated composites
R. U. Vinayak, G. Prathap, and B. P. Naganarayana	775	Beam elements based on a higher order theory—I. Formulation and analysis of performance
G. Prathap, R. U. Vinayak and B, P. Naganarayana	791	Beam elements based on a higher order theory—II. Boundary layer sensitivity and stress oscillations
Bo P. Wang and Jahau L. Chen	797	Application of genetic algorithm for the support location optimization of beams
M. W. S. Jaques, C. T. F. Ross and P. Strickland	801	Exploiting inherent parallelism in non-linear finite element analysis
A. Y. Tetelbaum	809	Prediction of structure and layout parameters for a hierarchical system

Dz-Chi Li, Jeng-Tzong Chen, Shiang-Woei Chyuan and Cherng-Yuan Sun	825	Computer simulations for mask structure heating in X-ray lithography
Qing Hua Qin and Cheng Xiong Mao	835	Coupled torsional–flexural vibration of shaft systems in mechanical engineering—I. Finite element model
Cheng Xiong Mao and Qing Hua Qin	845	Coupled torsional–flexural vibration of shaft systems in mechanical engineering—II. FE–TM impedance coupling method
		Technical Note
M. K. Wadee	851	Fat-fractal scaling in an area-preserving structural mapping
	I	Software Survey Section

NUMBER 5

Hsiang-Chuan Tsai and Ming-Kuen Wu	859	Methods to compute dynamic response of a cantilever with a stop to limit motion
I. Kaljević, S. N. Patnaik and D. A. Hopkins	869	Three-dimensional structural analysis by the integrated force method
J. B. Min, W. W. Tworzydlo and K. E. Xiques	887	Adaptive finite element methods for continuum damage modeling
C. Soize	901	Vibration damping in low-frequency range due to structural complexity. A model based on the theory of fuzzy structures and model parameters estimation
F. W. Williams, Xiaojian Liu and Wanxie Zhong	917	Investigation of the accuracy of the solution of the constrained substructuring method
A. Bayraktar, A. A. Dumanoğlu and Y. Calayir	925	Asynchronous dynamic analysis of dam–reservoir–foundation systems by the Lagrangian approach
Kyeong-Hoon Jeong and Seong-Cheol Lee	937	Fourier series expansion method for free vibration analysis of either a partially liquid-filled or a partially liquid-surrounded circular cylindrical shell
Y. Toi and D. Isobe	947	Finite element analysis of quasi-static and dynamic collapse behaviors of framed structures by the adaptively shifted integration technique
W. K. Lo and L. T. Lee	957	Equivalent systems for variable thickness circular plates
A. El Hami and B. Radi	973	Some decomposition methods in the analysis of repetitive structures

G. E. Blandford	981	Progressive failure analysis of inelastic space truss structures
S. B. Petersen, R. Balendra, J. M. C. Rodrigues and **P. A. F. Martins**	991	Animation of finite element models of metal forming processes
G. Sankarasubramanian and **S. Rajasekaran**	1003	Constitutive modeling of concrete using a new failure criterion
R. Ali	1015	Use of finite element technique for the analysis of composite structures
H. R. H. Kabir and **J. Al-Duaij**	1025	Analysis of simply supported shear-flexible transversely isotropic (ATJ graphite) moderately-deep cylindrical panels
L. Qiao, M. Hillmann and **R. Sünkel**	1031	Tangential loading transportation between roller and flat with modified Coulomb friction—a three-dimensional roll-contact calculation with the finite element method
Jaehong Lee, Z. Gürdal and **O. H. Griffin, Jr**	1045	Buckling and postbuckling of circular plates containing concentric penny-shaped delaminations
		Technical Note
A. A. Khan, M. Al-A'ali and **N. Al-Shamlan**	1055	Simplification of context-free grammar through Petri net
	I	Software Survey Section

NUMBER 6

N. G. Stephen and **P. J. Wang**	1059	Saint-Venant decay rates: a procedure for the prism of general cross-section
Y. M. Xie and **G. P. Steven**	1067	Evolutionary structural optimization for dynamic problems
Tien-kuen Huang	1075	Stability analysis of an earth dam under steady state seepage
J. A. Nemes and **E. Spéciel**	1083	Use of a rate-dependent continuum damage model to describe strain-softening in laminated composites
S. Pietruszczak	1093	On the mechanical behaviour of concrete subjected to alkali-aggregate reaction
E. N. Dvorkin, A. P. Assanelli and **R. G. Toscano**	1099	Performance of the QMITC element in two-dimensional elasto-plastic analyses
E. Salajegheh	1131	Discrete variable optimization of plate structures using dual methods

Aijun Ma, Suhuan Chen and Wanzhi Han	1139	Statistical properties of response for nonlinear structural systems with random parameters
M. A. De Rosa, C. Franciosi and M. J. Maurizi	1145	On the dynamic behaviour of slender beams with elastic ends carrying a concentrated mass
Y. W. Kwon and H. Aygunes	1161	Dynamic finite element analysis of laminated beams with delamination cracks using contact–impact conditions
A. Abdollahi	1171	Numerical strategies in the application of the FEM to RC structures—I
A. Abdollahi	1183	Investigation of objectivity in the application of the FEM to RC structures—II
N. Rajasekhara Naidu and G. Venkateswara Rao	1213	Free vibration and stability behaviour of uniform beams and columns on nonlinear elastic foundation
D. C. Winfield and Teong E. Tan	1217	Optimization of the clubface shape of a golf driver to minimize dispersion of off-center shots
V. Hosur and S. S. Bhavikatti	1225	Influence lines for bending moments in beams on elastic foundations
R. Brepta, F. Valeš, J. Červ and B. Tikal	1233	Rayleigh wave dispersion due to spatial (FEM) discretization of a thin elastic solid having non-curved boundary
S. M. Sun and M. C. Natori	1245	Numerical solution of large deformation problems involving stability and unilateral constraints
		Technical Note
J. Yuan and S. M. Dickinson	1261	On the vibration of annular, circular and sectorial plates with cut-outs or on partial supports
	I	Software Survey Section
	i	List of Contents and Author Index for Volume 58, 1996
